Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

The term "photoconductor" is incorrectly used though out the specification to mean "light guide". A photoconductor is a material that changes conductivity upon illumination, not something that guides light.

Appropriate correction is required.

Claim Objections

Claims 1-5 are objected to because of the following informalities: The term "photoconductor" is incorrectly used to mean "light guide". A photoconductor is a material that changes conductivity upon illumination, not something that guides light.

. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The impact of the incorrect use of the word photoconductor and photoconduction has an effect depending upon its use in different places in the claims, giving an

indefiniteness in photoconductor module, photoconductor cell, and photoconduction face. It appears as though the photoconductor module is a lighting module, the photoconductor cell is the waveguide, and the photoconduction face is the emission surface (or outgoing face, as it is referred to elsewhere in the claim).

The brightening layer being "composed of ... particles" does not seem possible- it seems a binder or something would have been required. Here the problem is the closed term "composed of"- using substantially composed of or such would overcome the problem.

Allowable Subject Matter

Claims 1-5 would be allowable if rewritten or amended appropriately to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

None of the prior art taught or disclosed a liquid crystal cell employing a waveguide with the optical particles having multiple projections, further that the particles be part of a brightening film (collimating), and further that it be combined with the color changing layer.
